

PROJECT 1

Empathy Mapping for Fitness App

Understanding users before designing solutions

June 2026 - DecodeLabs Internship

Problem Statement: The Real Problem Isn't Laziness

Busy professionals don't avoid fitness because they don't care. They struggle because fitness often feels like another task on an already exhausting day.

A Typical Day Looks Like:

June 2026 - DecodeLabs Internship

Who Are We Designing For?

Our primary users are working professionals who care about their health but find it difficult to prioritize fitness due to work commitments and lifestyle constraints.

Audience Breakdown:

Age Group
24-40 years

Occupation
Software Engineers, HR Managers, Marketers, Analysts

Work Type
Desk-based / Hybrid / Remote

Lifestyle
Busy, sedentary, high-stress

Core Pain Points:

June 2026 - DecodeLabs Internship

User Persona

Understanding the person behind the pain points

Primary User
Name: Rahul Sharma

Age: 32

Occupation: Data Analyst

Location: Noida

Income Level: ₹8-12 LPA

Work Schedule: 9 AM - 7 PM

Bio:
Rahul is a Data Analyst working in a fast-paced environment. His work involves long hours, tight deadlines, and extended screen time, leaving little room for fitness.

User Mindset:

Goals

- Stay fit
- Lose weight
- Improve stamina
- Build consistency

Frustrations

- No time for gym
- Too tired after work
- Cannot maintain routine
- Long sitting hours

Motivations

- Better health
- More confidence
- Reduce stress
- Improve lifestyle

June 2026 - DecodeLabs Internship

The Empathy Map

Understanding the real behavior, thoughts, and emotions of busy working professionals.

SAYS
What users say out loud.

- I want to get fit, but I have no time.
- I'll start from next Monday.
- I'm too tired after work.
- My lifestyle isn't healthy.
- Long workouts don't work for me.

VOICE

THINKS
What users think internally.

- I need to take my health seriously.
- I want results, but I struggle with consistency.
- I don't have enough energy after work.
- How do others stay so consistent?
- Fitness feels like a huge commitment.

MIND

DOES
What users actually does.

- Sits for 8-10 hours daily.
- Skips workouts or does them rarely.
- Eats whatever is convenient.
- Tries to follow plans but quits.
- Watches fitness content but doesn't act.

ACTIONS

FEELS
What users feel emotionally.

- Physically tired after work.
- Frustrated with inconsistent routines.
- Unmotivated to begin.
- Mentally drained from meetings and deadlines.
- Stressed due to poor work-life balance.

EMOTIONS

Insights: Busy professionals want to stay fit, but limited time, low energy, and inconsistent routines make fitness difficult to maintain.

June 2026 - DecodeLabs Internship

DESIGN DIRECTION

Design a simple, flexible, and time-efficient fitness experience that fits naturally into busy everyday routines.
